**We are experts in A/C**  
for antique cars & special vehicles

## About Coldmaster

We are leaders in design, manufacturing and customizing of air conditioning for multiple vehicles and applications for over 30 years.

Coldmaster offers reliable products and services that deliver the best experience and quality, through a team of highly trained technicians and engineers fully committed to provide an excellent experience for all clients.

At Coldmaster we abide to our high quality promise by carefully selecting the best components in the market, and ensuring proper ISO certified manufacturing throughout our supply chain. Allowing Coldmaster to provide effective solutions for our client's vehicles, while at the same time ensuring customer satisfaction.

## A/C Kits and spare parts

Our universal A/C kits are **compatible with any car or truck**, but it's important to ensure you **have enough space to mount the components**. Please carefully review the item description and all the pictures, particularly those showing the underdash dimensions, to fully understand what the kit includes and excludes.

**While the kit contains all the necessary A/C components as listed, it does not include a compressor bracket.** This is because the kit is designed to accommodate different engines and preferences. You'll need a 508 compressor with either a 2 A pulley or an 8-groove pulley. If a PK8 pulley is required, you can request it after your purchase.

To complete the installation, you'll need to source a compressor bracket separately. These vary depending on the engine and individual needs, but many companies specialize in them. Simply search for a "508 compressor bracket" to find one that suits your setup.
